MONUMENT

When heaven and earth unite in mythology, gods and creatures emerge. Monumental beings that create and move.

These gods give their names to the individual models in the new series.

With the new Monument series from REIZ, we create and design from the colour spectra and dimensions of the surfaces. Inspired by looking into the distance and reflecting on what is close at hand - the gaze of observation and focussing.

The "Kronos" and "Hera" models were born from the genesis of charm. Monuments of perseverance, outstanding aesthetics and plasticised timelessness.

Kronos and Hera are the monuments that herald the new age of REIZ.
